- Ability to install and administer electro-medical hardware, software, and networks
- Strong electronic, electrical, and IT knowledge (advantageous)
- Valid Code B South African driver's licence with own reliable vehicle
- Computer literacy (essential)
- Basic anatomy knowledge
- Ability to work independently and within a team
- South African Citizen
- Must reside in East London area

Key Competencies & Skills

- Honesty, accountability, and reliability
- Professional, presentable, and punctual
- High attention to detail and accuracy
- Ability to work under pressure and manage frequent interruptions
- Self-motivated with a proactive approach
- Strong communication skills (verbal and written)
- Customer service excellence
- Team player with strong collaboration and team-building ability
- Decision-making and problem-solving skills
- Good presentation and listening skills
- Willingness to take responsibility and contribute to team success

Key Responsibilities

- Calibrate and verify electro-medical devices according to specifications
- Maintain accurate records and filing of calibration certificates
- Perform fault finding and technical repairs
- Conduct on-site maintenance and repairs efficiently and professionally
- Ensure quality control of equipment
- Compile and submit reports (daily call reports, weekly work plans)
- Maintain accurate stock control in designated location codes

- Commission new electro-medical equipment
 - Ensure high levels of customer satisfaction at all times
-
